

trackstick™

SUPER

The best choice for government agencies, police, intelligence, and homeland security personnel.

The weatherproof case and removable magnetic mount allow for covert installation.

Like all Trackstick devices, Super Trackstick works anywhere on the planet. Its traveled locations can be shown via a red line that is traced on satellite photos and 3D terrain using the latest mapping technologies from Google™ Earth.

Super Trackstick continuously records its exact route, stop times, speed, direction, and other valuable information, all of which can be quickly downloaded and viewed on your computer. It even has its own temperature recorder to help monitor the surrounding environment. A vibration detector, combined with proprietary low-power GPS technology, helps to make this an ideal energy-saving GPS device.

No monthly fees are required and Trackstick Manager, the most advanced tracking and geo-photo tagging software on the market, is provided freely in our [download section](#).

	Full Power	Power Save
Alkaline	3-6 days	2-3 weeks
NiMh	6-8 days	4-6 weeks
Lithium	1-2 weeks	6-8 weeks

Works with
Google™ Earth
Google™ Maps
Microsoft™ Live
and more

 **Made in the USA**

- 4 1/2" X 1 1/4" X 3/4"
- 2.5 meter horizontal accuracy
- Integrated USB 2.0 connector
- Weatherproof case, detachable magnetic mount and belt clip
- Integrated directly into Google™ Earth for worldwide use
- 4Mb flash memory records months of location histories
- Vibration detector for longer battery life
- Built in temperature recorder -10°C (14°F) to 60°C (140°F)
- Runs on two (2) AAA batteries
- Requires Windows™ computer with USB1.1/2.0 port
